1 About this manual

This manual is intended for Kvaser DB9-Power Inlet users. This document contains a description of the hardware's properties.

2 Introduction

This section will describe the functions and features of the Kvaser DB9-Power Inlet.

2.1 Welcome to Kvaser DB9-Power Inlet

Figure 1: Kvaser DB9-Power Inlet

Kvaser DB9-Power Inlet is a power injector for CAN busses from a DC power jack into one female D-SUB9 connector. The Kvaser DB9-Power Inlet also has one unpowered male D-SUB9 connector for connecting to the CAN network. The Kvaser DB9-Power Inlet provides a simple and safe way to supply Kvaser bus powered interfaces with power, such as Kvaser's Blackbird and Memorator series.

2.2 Major features

- Acts as a power injector through the female D-SUB9 connector only.
- Connects to power supply using a standard 2.0 mm DC power connector.
- A complementary 12 V DC, 1 A power supply is included.

3 Kvaser DB9-Power Inlet hardware

Kvaser DB9-Power Inlet is a power injector for CAN buses which supplies power from pin 1 (center) of the DC 2.0 mm Power jack to pin 9 on the female D-SUB9 connector. DC ground, pin 2 (outside) of the power jack is connected to pin 3 of both the female and male D-SUB9 connector. Pin 1 to 8 of the female and male D-SUB9 connector are interconnected, see Table 2.

3.1 Power Distribution

The Kvaser DB9-Power Inlet should be powered from an external DC power supply, via a 2.0 x 6.3 mm connector, providing a power source for Kvaser CAN interfaces via CAN_V+ (pin 9) in the female D-SUB9 connector.
